

## AMERICA'S ESSENTIAL HOSPITALS

### Sherri T. Loeb, RN, BSN

Sherri Loeb has been a health care professional for 33 years. She received her BS in Biology from Drake University in Des Moines Iowa in 1980 and a BS in Medical Technology concurrently from Northwestern University School of Medicine. She continued on at Northwestern to receive a BSN and RN in 1983.

Sherri has extensive nursing experience having functioned for many years as a staff nurse at Northwestern Memorial Hospital and NorthShore University HealthSystem on adult cardiac and general surgical care floors, cardiac electrophysiologic intensive care units and general intensive care units. She also has experience working in a university affiliated physician office specializing in cardiology and endocrinology. She has spent time working in utilization review. Prior to assuming her last position managing a two bed outpatient research unit, Sherri functioned as the sole nurse for a five physician, university affiliated ambulatory surgical practice specializing in cosmetic and reconstructive surgery.

When her husband was diagnosed with stage four prostate cancer in 2011, Sherri became his fulltime personal navigator and ombudsman. Even after almost 30 years as a registered nurse, our fractured system was an eye opening experience. Her goal is to make sure that the care her husband receives is safe, compassionate and evidence based as long as possible, and a model for all patients entering the health care system.

Sherri resides in Buffalo Grove, Illinois where she has been active for more than 15 years in volunteering for the Buffalo Grove Fire Department. She and her husband have two daughters, one a third year medical student and the other a first year law student. She is also the proud mom of two beautiful Havanese puppies.
