

# Tim Tindle

---

Executive Vice President and Chief Information Officer,  
*Harris Health System*

Mr. Tindle has spent more than 30 years developing and deploying business and clinical information technology solutions. In 1982, he was one of ten individuals that formed Compaq Computer Corporation and pioneered the use of client-server based information systems. Mr. Tindle previously served as President of an international consulting firm delivering industry-leading technology solutions to the Healthcare, Insurance, Manufacturing, and Energy industries.

Since joining the Harris Health System, Mr. Tindle has perused transformational technology strategies that improve the quality of patient care and reduce the per-capita cost of providing that care.

Under his leadership and direction, the Harris Health System earned national recognition for its use of technology to improve patient safety, advance the clinical decision-making process, streamline their supply chain, and provide more cost-effective care to Harris Health System's patients.

**Harris Health System Information Technology Awards include:**

- Health and Hospital Network's (H&HN's) Most Wired Award
- HIMSS Analytics Stage 6 Award for advanced EMR adoption (Inpatient)
- HIMSS Analytics Stage 6 Award for advanced EMR adoption (Ambulatory)
- H&HN's Innovation Award for Supply Chain Automation
- GHX Best 50 in the Nation for Healthcare supply chain automation
